

SynSmart awards integrated chemistry laboratory infrastructure contract to LabGuard

August 25th 2023: Mumbai, India

SynSmart Rasayan Research Private Limited (SynSmart) today announced the award of its chemistry laboratory infrastructure contract to LabGuard India (LabGuard).

Under the terms of this agreement, LabGuard will add new chemistry lab-space and create multiple labs in a modular fashion. This will be in addition to the lab-space built and made operational in July-23. With this award, SynSmart will have an installed capacity of up to 30 fume-hoods spread across 5,000 Sft in a modular fashion.

Commenting on this development, Sachin Narkhede, Co-Founder SynSmart said *“We are working with a sense of urgency while wanting to ensure long-term efficiencies of our labs and with LabGuard, we found a compelling partner who offered seamless support and ability to deliver on time one of the best infrastructures in chemistry lab furniture”.*

Commenting on this, Salil Sansare, CEO & Director of LabGuard said “We would like to express our gratitude to SynSmart management for their recent order of high performance EKA fume hoods. These 21 hoods will be shipped & installed within a month. EKA hoods, marked by their unparalleled user-friendliness, ergonomic design, advanced safety features, and expansive workspace, stand poised to catalyse the research capability of SynSmart.”

About SynSmart Rasayan Research Private Limited:

Founded in 2014, SynSmart has made its name in chemistry services for early-stage discovery projects as well as collaborative scale-up and manufacturing support services. Our growing team of 50+ chemists has delivered on projects ranging from mg scale to multi-tonne scale across wide chemistry modalities for global customers.
