

## **SynSmart announces appointment of Mr. Saurabh Kapure as its CEO, Creation of US entity and inauguration of chemistry labs.**

### **Newtown, Pennsylvania, United States & Mumbai, Maharashtra, India:**

SynSmart Rasayan Research Private Limited today announced the appointment of Mr. Saurabh Kapure, a CRO/CDMO industry veteran as its Chief Executive Officer while also announcing the creation of an US affiliate SynSmart Rasayan Research LLC and inauguration of a state-of-the-art chemistry research facility.

Commenting on this, SynSmart's Founder and COO Mr. Sachin Narkhede said, *"With the infusion of fresh capital and addition to our talent pool, SynSmart is geared up to cater to chemistry contract research business for partners in US, EU and Japan. Saurabh's joining to lead SynSmart is coinciding with our 7,500 sft chemistry site coming on stream and our labs becoming fully operational."*

Mr. Saurabh Kapure- Chief Executive Officer

Commenting on this, Mr. Saurabh Kapure said, *"I am delighted to take on this responsibility at SynSmart. Having been part of the CRO/CDMO eco-system for over two decades, I see SynSmart is uniquely placed in delivering value to its customers through efficient operational structure with minimum overhead costs. The scientific team at SynSmart comes with experience from large CRO's allowing us to understand and meet partner expectations seamlessly. Our chemistry labs are equipped with high performance 7-ft wide fumehoods that are energy efficient and equipped with VAV system. Further, with the creation of an US affiliate SynSmart Rasayan Research LLC, we are aiming to address multitude of logistics challenges incurred in procurement of building blocks or specialty chemicals while also providing real-time support to our partners."*

### **About SynSmart Rasayan Research Private Limited:**

Founded in 2014, SynSmart has made its name in contract research chemistry, custom synthesis, chemical library synthesis services for early-stage discovery projects under FTE or FFS based business arrangements. Further, our process research, route-scouting and scale-up group has developed KSMs and building blocks starting from mg-scale to multi-tonne scale. Our growing team of 50+ chemists has delivered on projects across wide chemistry modalities for global customers in pharma, biotech, agrochemicals, food and fragrances industry.
